

Finally! Change Ceiling Light Bulbs in Your Facility Safely, Quickly, and Inexpensively.

Stadium Seating and Sloped Floors Are No Problem!

Do you have burned-out light bulbs in places you've never been able to reach?

- 💡 Auditoriums – over the rows of seats.
- 💡 Churches – above the pews, and balconies.
- 💡 Theaters with stadium seating.
- 💡 Lectures halls with desks or stadium seating.
- 💡 Stepped balconies.

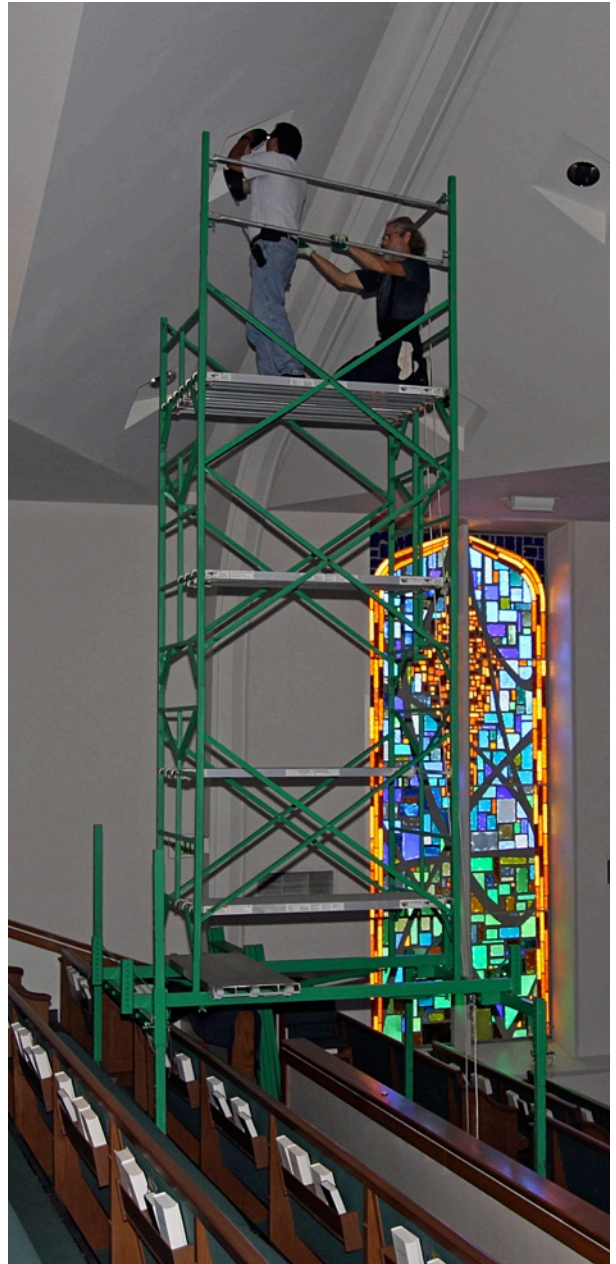

Using the Light Bulb Scaffold™ System, you can change Impossible-To-Reach bulbs in about 20 MINUTES!

- 💡 Low initial investment - less than half the cost of an electric lift, and **no** maintenance.
- 💡 Adjustable for **any** row spacing.
- 💡 Sets up in minutes. No part weighs more than 35 pounds. No tools required.
- 💡 Easy to store.
- 💡 No more outside maintenance contractors.
- 💡 Safe and sturdy – meets all OSHA regs.
- 💡 A *complete* scaffold system for your entire facility. See more at churchscaffold.com.

- Change Light Bulbs
- Service Speakers
- Sprinkler System Service
- A/C and Filter Service
- Emergency Lighting Service

Currently in Use on 4 Continents:

- Madison Square Garden, Alamo Draft House Cinemas, Fox Theaters, and countless churches, schools, universities, and electricians in the US.
- The UN School in Hanoi Vietnam.
- Churches, universities, and contractors in Africa.
- The US government uses The Light Bulb Scaffold System for security work at many of our embassies in Europe and the Caribbean.

Repairing a light fixture above the stepped balcony in a church. This scaffold was rolled down to the next fixture in about five minutes. The tower was taken down and re-assembled above the next row of pews in about 25 minutes.

US Patent 8,640,827

Easy to Transport and Store

- 💡 The Light Bulb Scaffold™ System is shipped to you in two easy-to-handle rolling storage racks.
- 💡 Each rack will fit through a 3-foot doorway.
- 💡 They store easily in about 28 square feet of floor space.
- 💡 Both racks can be rolled into a box truck (or even onto a 5 x 8 utility trailer) for easy transport from site to site.

Approximate Pricing

(March 2014)

The Light Bulb Scaffold™ System
to allow your men to stand at a height of:

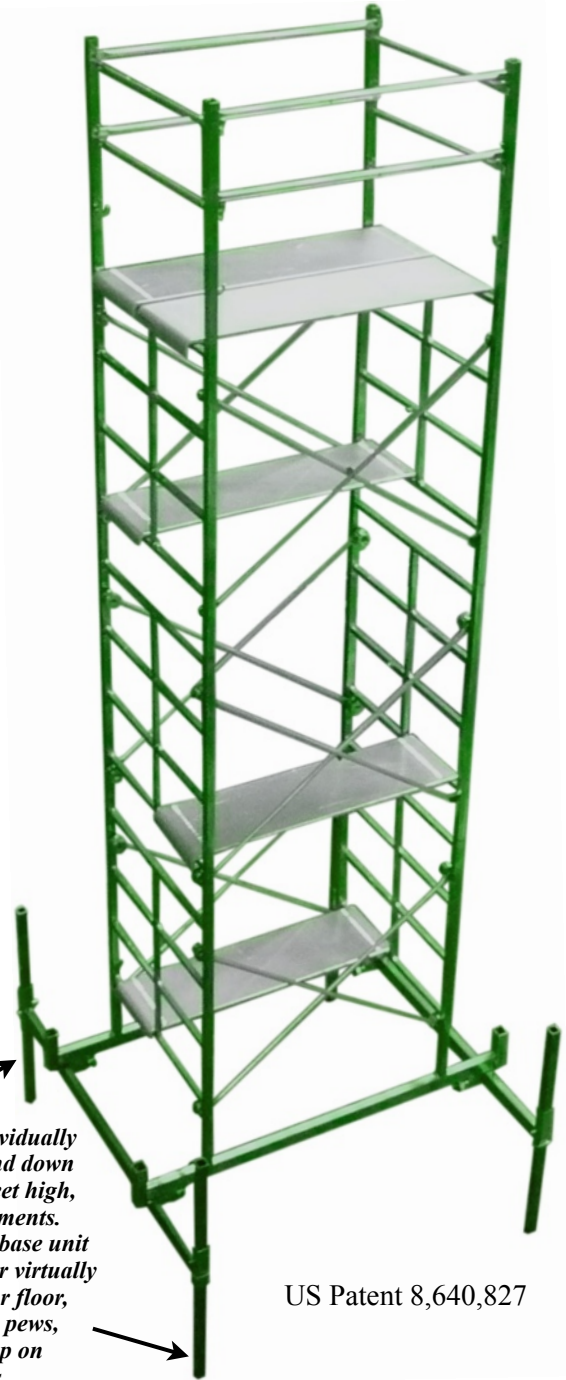

20 Feet	\$3,818.00
25 Feet	\$4,166.00
30 Feet	\$4,513.00
35 Feet	\$4,861.00
40 Feet	\$5,208.00
45 Feet	\$5,556.00
50 Feet	\$5,903.00
55 Feet	\$6,250.00
60 Feet	\$6,598.00

(Freight is additional, and ranges between \$300 to \$900, depending on your location. Ships from 71104.)

- 💡 Maximum working height: 150 feet.
- 💡 Maximum platform load: 800 pounds.
- 💡 Platform: 4 feet by 5 feet.
- 💡 Lifetime warranty.

Every package is a complete system. It comes with all accessories, including enough frames to go the height selected, 2 half-frames, 6 telescoping legs, 6 locking swivel casters, gin pole, spanner kit, aluminum walk decks, cross braces, guardrails, and rolling storage racks.

Please call for complete package prices over 60 feet high, or under 20 feet high.

Every leg is individually adjustable up and down from zero to 5 feet high, in 1/2-inch increments. That means the base unit can straddle over virtually anything on your floor, including desks, pews, and easily sets up on stairs and slopes.

US Patent 8,640,827

"We used to spend thousands on outside scaffold contractors, and wait for three dark days, every time we had to change out an LED sign panel over our stadium seating. Now our own electricians do the job in a couple of hours."
